**Subject:** Your COVID-19 test result -  
CUR157008795

Hi Joyce,

This is an automatic notification about your recent COVID-19 RT-qPCR test result from Curative. Your COVID-19 RT-qPCR test was **NEGATIVE**, meaning that the virus that causes COVID-19 was NOT detected in the specimen you provided. We do want to inform you that, like all tests, the RT-qPCR tests performed by Curative do have limits. [Here](#) is some more documentation on how to interpret your test.

If you are feeling cold or flu symptoms including loss of taste and smell sensation and test negative, please follow-up with a medical provider or the county health department to get retested.

Here is information about your test:

Appointment: CUR157008795  
Patient: Joyce  
Collected at: 12/21/2021 5:38 PM PST  
Result: **NEGATIVE**  
Released at: 12/22/2021 9:21 AM PST

[Click here](#) to access your test results.

[Click here](#) to find additional COVID-19 resources.

Our test is an RT-qPCR test that detects the presence of viral RNA in samples. If you are interested in reading more on how to interpret your results please [click here](#).

Be well,  
Curative
