TESTING

Predicine, Inc.  
3555 Arden Road  
Hayward, CA 94545  
CLIA 05D2148483

Collected: 5-27-22

Reported: 5-27-22

Reported By: James

Sources: Rapid Antigen Test

LAB DIRECTOR: John J. Iocco M.D.

SARS-COVID-2 RAPID RESULT

POSITIVE

PATIENT LAST NAME, FIRST NAME

Terence Nash

DATE OF BIRTH

5-24-96

SEX

M

This test is intended to be performed on respiratory specimens collected from individuals who meet Centers for Disease Control and Prevention (CDC) clinical and/or epidemiological criteria for COVID-19 testing. CDC COVID-19 criteria for testing on human specimens are available at CDC's web page Information for Healthcare Professionals: Coronavirus Disease 2019 (COVID-19) (<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/index.html>)

A detected result is considered a positive test result for COVID-19. This indicates that RNA from SARS-CoV-2 was detected, and the patient is considered infected with the virus and presumed to be contagious. If requested by public health authorities, specimens will be sent for additional testing.

An inconclusive result means not all of the testing targets were detected, additional sample collection may be considered. A Not detected (negative) test result means SARS-CoV-2 Antigen was not present in the specimen above the limit of detection. A negative result does not rule out the possibility of COVID-19 and should not be used as the sole basis for treatment of patient management decisions. If COVID-19 is still suspected, based on exposure history together with other clinical findings, re-testing should be considered in consultation with public health authorities.

Laboratory test results should always be considered in the context of clinical observations and epidemiological data in making a final diagnosis and patient management decisions.
