## SUMMARY

I'm currently a Junior in pursuit of my Bachelor's of Arts in Mathematics. I'm also minoring in music which I feel very passionate about, I write songs on guitar and do a lot of home recording and production. I play and record everything myself at home. I've found my calling in teaching and tutoring and plan to take the teaching concentration. I'm someone you can depend on whether the job requires thinking critically or working with my hands. One thing I've realized about teachers that have had the greatest impact on me is that they've all been well-rounded people, and I'm confident in honing and adapting my skills not unlike those that have most inspired me to meet various objectives.

## EXPERIENCE

### **Warehouse Shipping Worker & Production Talent, Nalpak Inc.**

San Diego, California — 2011-2013

I divided my time operating forklifts, working in the shipping department, as well as manufacturing and assembling the Tuffpak tripod and gun cases. Through the manufacturing and assembly process I became skilled with a wide range pneumatic tools from rivet guns, to nailers and sanders.

#### **Accomplishments**

- Employee of the Month
- Top selling year for Tuffpak tripod and gun cases

### **Computer Repair - At-Home Computer Repair**

San Diego, California - San Francisco, California — 2010-Present

As a hobby as well as a part time gig, I repaired hundreds of computers in San Diego and still continue to do so in San Francisco. I can troubleshoot and fix anything from hardware issues to software issues in laptops as well as desktop computers. I've repaired screens, installed operating systems, replaced hard-drives, RAMs, I've even installed the Apple OS on PC laptops. I love tinkering around with these things.

## EDUCATION

### **Grossmont College**

2009-2013

I attended Grossmont Community College part-time as I met all the CSU transfer requirements. During my time spent at Grossmont, I was a recipient of the Dean's List Award 3 times, as well as invited to become a member of the Honor's Society on Campus, Phi Theta Kappa. As a working musician, I was invited to play on campus on a number of occasions.

### **San Francisco State University**

2013-Present

I'm currently attending San Francisco State University and studying Mathematics. I plan to continue my education following graduation by applying for the teaching credential program, in hopes of one day becoming a math teacher.

## VOLUNTEER WORK

### **Activity Leader - Country Hills Health Care & Rehabilitation Center**

2009

I assisted elderly patients and disabled patients in their daily activities, such as transporting them to their meals in the cafeteria and 'leisure activities. I also read them books at night.
