I am seeking a position in a familiar work environment that will be fast paced, team oriented and constantly on the move with a team that shares the same common goal. Definitely interested in a job in which I can advance myself and enjoy the work days.

I am openly available and I am ready to start immediately.

## Prior experience:

Was previously an employee at a cold food and aircraft catering company. Worked on a food line, as well as in a cold room for the packaging and shipment of our product. I've got plenty of experience working on a line, and in a team environment with my experience in the stockroom at Ross dress for less, as well as the sandwich line and cold rooms at LSG Sky Chefs.

Qualifications: I've got quite a bit of experience in a fast paced work environment from a passed position in shipping and receiving. Good customer service skills, easily deal with customers and the public. Great awareness, appliance safety, always busy, maintain a constant clean work environment and very alert while on the clock. Having grown up in a busy household I deal with stress, and the constant overload well and patiently work through it the task at hand.
