ACCOMPLISHMENTS

CAREER HIGHLIGHTS: Although my past work experience differs from the job position I am applying for. I have had the privilege with multiple different jobs being the Assistant Manager as well as a General Manager of a great team. I would sometimes help assist in the interviewing and recruiting of potential future employees. And as with just about any Manager position, it was my responsibility to teach and train these new employees. Based on always keeping a positive attitude and desire to always perform my best in a fast paced and sometimes stressful working environment, I made a great team leader and supervisor to my co-workers. I believe in leading by example. And regardless of my position and authority over the employees, I showed that I did not believe I was too good for a certain task, by willingly helping out with all of the dirty and tough jobs. Later I decided to make a career change, and went back to school to become a Diesel Technician. And based on my past work experience and life lessons that helped mold me into the hard working dedicated person that I am today, I truly believe that I would be a great employee to your company.
