Leadership

As a leader, you need to be able to clearly and succinctly explain to your employees everything from organizational goals to specific tasks. Leaders must master all forms of communication, including one-on-one, departmental, and full-staff conversations, as well as communication via the phone, email, and social media. A large part of communication involves listening. Therefore, leaders should establish a steady flow of communication between themselves and their staff or team members, either through an open-door policy or regular conversations with workers. Leaders should make themselves regularly available to discuss issues and concerns with employees.
