Tue, Sep 26, 2017 at 10:44 AM

Good Morning,

My previous hospitality experience has ranged from bartending, serving, and bar-backing at fine dining establishments, working as the Event Lead for weddings and events at a private golf club in South San Jose, fast-paced environments such as night clubs and catering events, and most recently bartending at the top Hotel in Cupertino as well as at Levi's Stadium for the 49ers games. My goal is do whatever it takes to ensure that our guest have an exceptional experience. I can ensure you that while making sure your guest are being served promptly and with great service, I will also be keeping a close eye on the behavior of those who partake in drinking to ensure a pleasant environment for everyone.

As you know, professional bartenders are an important asset to any event. I believe my experience and training make me a strong candidate. My current resume mainly contains my Medical Device Career Experience because at the moment I am only taking on small bartending and serving gigs.

Please email or call (408)784-9997 if you have any questions.

I look forward to speaking with you soon,

Anthony Campos

## Professional Experience

### **Sr. Operations Specialist – *Energy Medical Systems, Campbell, CA* • August 2016 – Present**

Supervises all the functions of production to ensure timely and efficient manufacturing of high quality products. Create and sustain standard assembly, testing, and inspection processes for new product. Implemented line balancing and updated process flow to existing product to meet build demand. Drives continuous improvements throughout organization including Quality Insurance and Material Handling. Performs product inspection, metrology, performance testing, and product release activities to ensure quality and conformity. Generates and maintains BOM, travelers, and other quality system documents of devices being processed. As Operations point of contact during external audits, have continuously improved company's performance. Reduce product cost by revising components, working with new suppliers for custom components, and reducing standard build time. Tracked internal quality of products using metrics and generated reports. Present metrics, build plans, and other production updates to management and other senior leaders.

### **Manufacturing Lead - *Intuitive Surgical, Sunnyvale, CA* • April 2013– July 2016**

Production Lead with over 3 years of experience over seeing three production lines in a Medical device manufacturing setting. Scheduled, trained, and directed 30 technicians on daily basis to ensure production goals are met. Reviewed and resolved mechanical issues with assembly and equipment found on production lines. Highly involved with FMEA and launch phases of new surgical instruments. Generated documentation (DHR, BOM, Traveler, NCR, VR, etc.) for the vast array of issues the line faced day to day and escalated issues when needed to appropriate department. Strong communication skills between various departments such as production management, planning, engineering, and material handlers allowed me to successfully meet demands. Ensured all expectations and requirements determined by FDA Guidelines and Good Manufacturing Policies are met. Generated production reports including KANBAN Levels, production status, Scrap Levels, Continuous improvement tracker, and others which I presented during weekly meetings. Was highly involved in review and approval of submitted continuous improvement forms. Passed each internal and external audit with consistently high scores.

### **Manufacturing Trainer - *Intuitive Surgical, Sunnyvale, CA* • October 2011 - April 2013**

As a trainer, I supported the Instruments area for Vessel Sealer and Bipolar products. Delivered OJT training courses in the areas of manufacturing skills and processes, quality system/GMP practices and requirements, information technology tools, and other subjects as required. Identify, evaluate and prioritize production floor training needs. Audit production lines based on practices and guidelines for Quality System Auditing and Manufacturing Standard Work Audits (SWA). Conduct training of manufacturing personnel and perform certifications per certification criteria and requirements. Assess employee skills and provide feedback to management. Properly complete manufacturing training documentation (Department and Standard Operating Procedures). Initiate reports; escalate quality issues, report efficiency, record measurements as needed. Assist Engineering Team with documentation, line balancing, and build processes improvements. Firm understanding of Demand Flow Technology/Lean Manufacturing/Good Documentation Practices concepts and disciplines.

## Accomplishments

- ❖ As lead for New Product Introduction projects with ISI, successfully completed all Process qualifications and launch for 16 new surgical instruments

- ❖ Heavily involved with coordination and setup of Production Line Transfer to Mexicali Plant ensuring documentation was accurate and process flows were instituted
- ❖ Decreased assembly time on ISI product by 25 minutes by implementing MPI redlines, line balancing, and other manufacturing processes improvements
- ❖ Lead improvement projects such as Production Line Footprint reduction and CER Material Transaction Audit Process
- ❖ Day to day activities include leading a team of up to 30 technicians to perform a variety of manufacturing production, design, and process validation projects
- ❖ As Assembly Trainer, part of a training project that trained 30 Spanish speaking technicians for a production line transfer to Mexicali plant.

## **Interpersonal/Personal Skills**

- ❖ New Product Team Leadership
- ❖ Clear verbal and written communication
- ❖ Problem Sensitivity
- ❖ Innovator
- ❖ CCEE (Character/Capacity/Experience/Energy)
- ❖ Motivating, developing, and directing crews
- ❖ Organization and prioritization

## **Technical Skills**

- ❖ Well versed in SAP and AGILE
- ❖ Microsoft Applications (One Note, Excel, Power Point, Word)
- ❖ Controlled Environment Room (CER) experience
- ❖ Understands CAD drawings and can effectively communicate to fellow team members
- ❖ MPI, DOP, Lean Manufacturing, COMMWIP, 5s, Continuous Improvement, and GMP
- ❖ Troubleshooting testing equipment, fixtures, and units that have failed testing
- ❖ Quality inspection of fixtures and materials using microscopes, calipers, multi-meters and other electrical measuring equipment

## **Education**

Communications A.A. – Mission College, Santa Clara • in process
