## Additional Information

I have operated commercial dishwashers periodically throughout the years.

My first job was at Jack's donut wheel in North Sacramento in 1974 washing dishes and pots and pans and wiping tables and moping floors.

I single handly operated the scullery on board a U.S.Navy destroyer.

I have operated commercial dishwashers several times throughout the years as a federal inmate while serving a prison sentence for illegally transporting a minor across state lines in 2004.

Yes, I have made bad decisions in my life that I have paid for. And yes I consider myself a good employee.
