**PROJECTS:**

**Gastronomic Tourism— *market study***

For me, tourism and gastronomy are linked, for example if we visit a city, a town or a village, we will always remember that place if we had a gastronomic experience, such as smells, flavors and experiences, if I generate a tourism company that I can do a gastronomic city tour and be able to develop alliances with restaurants that can provide me with certain facilities to be able to fulfill that dream. Obviously, I will work on that project with more breadth and dedication. I am currently developing ideas and studying the market.
